

SLENDERPANE

QUALITY HERITAGE SLIMLINE GLASS SOLUTIONS

Slenderclear Toughened Glass

4mm Clear – Softcoat – Obscure.

Sizes from 250mm x 250mm down to 100mm x 100mm

We have a glass toughening solution for heritage panes that need toughening but are too small for most toughening plants all this can be done in our own workshop in Haddenham.

Our expertise in the manufacturing of small slim heritage units and the introduction of a small toughening plant has allowed us to now process toughened glass efficiently with sizes own as small as 100mm x 100mm.
