SLENDERPANE

QUALITY HERITAGE SLIMLINE GLASS SOLUTIONS

About Us

Standard double glazing is bulky. Ours is refined. **Custom-built for trade customers** in our Buckinghamshire workshop, our units combine **British craftsmanship** with cutting-edge "warm edge" spacer technology.

The result?

Thin double glazed window units that are virtually indistinguishable from single glazing, yet **fully compliant** with modern building regulations.

Whether you're restoring sash or casement windows, don't compromise. Retain the elegant, slim profile of the past while enjoying the warmth and silence of the future.
